

7/29/2016

Dear Neighbor,

Delivering reliable energy through a strong electric system is Eversource's top priority. Part of providing reliable service to our customers is safely operating and managing our facilities, in compliance with all state and federal regulations.

Over the course of the next several months surveying work will be performed within and along the Eversource transmission right-of-way that is located on or adjacent to your property.

These surveys include the mapping of wetland areas, areas of historic or cultural significance, priority habitats for state or federally listed species of concern and marking the boundaries (easement limits) of the transmission right-of-way.

An easement is landowner's property that has limited use by another – in this case, by Eversource for reliable operation of its power system. *The survey information we obtain is for the sole use of Eversource. No data or information will be provided or sold to another company or third party.*

What You Can Expect

Eversource has authorized these companies to perform surveys of the rights-of-way that are located on or next to your property. The survey employees will carry a letter of introduction so they may request access to properties along transmission rights-of-way and perform this important survey work.

Surveys are non-invasive, and are conducted for land information only. The survey work is likely to involve people and survey equipment in the rights-of-way beginning later this month and lasting until November, 2016. All Eversource employees and contractors carry identification with them.

Our Commitment to You

Keeping the lines of communication open is an important part of our work in your neighborhood. If you have any questions or require additional information on this electric reliability project, please call me directly at (603) 634-2803 or by email at Michael.stanek@Eversource.com.

Thank you in advance for your patience and cooperation as we work together to improve local and regional electric reliability.

Sincerely,

Michael Stanek
